Purpose

This paper describes HSCIC Official Statistics publications planned for February to April 2015, media coverage for press released Official Statistics publications and web activity for publications released in November and December 2014.

Background to HSCIC Official Statistics

At 1 October 2014, the HSCIC is responsible for 88 active (currently published or planned for future release) series of Official Statistics of which 30 are designated as National Statistics, which means that the UK Statistics Authority (UKSA) recognises them as being compliant with the Code of Practice for Official Statistics.

Official Statistics are expected to evolve and improve over time, to meet the changing needs of our users, to improve their quality and utility and to respond to changes in the administrative and management data sources.

“Experimental statistics” are new Official Statistics that are under-going evaluation. A key part of this evaluation is user engagement whereby the HSCIC invites readers to comment on the publications, which helps to inform future releases.

Most HSCIC Official Statistics are published annually or more frequently. Generally, each edition is similar in content to previous versions but any substantial changes are noted below (note: no such changes are yet planned).

National Statistics are identified below with [NS]
