Purpose

This paper describes HSCIC Official Statistics publications planned for a three month forward look period, media coverage for press released Official Statistics publications and web activity for publications released in December 2013.

Background to HSCIC Official Statistics

At 1 January 2014, the HSCIC is responsible for 111 series of Official Statistics of which 38 are designated as National Statistics, which means that the UK Statistics Authority (UKSA) recognises them as being compliant with the Code of Practice for Official Statistics.

“Experimental statistics” are new Official Statistics that are under-going evaluation. A key part of this evaluation is user engagement whereby the HSCIC invites readers to comment on the publications, which helps to inform future releases.

Official Statistics are expected to evolve and improve over time, to meet the changing needs of our users, to improve their quality and utility and to respond to changes in the administrative and management data sources.

Most HSCIC Official Statistics are published annually or more frequently. Generally, each edition is similar in content to previous versions but any substantial changes are noted below (note: no such changes are yet planned for April or May’s publications).

National Statistics are identified below with [NS]

Forthcoming Publications Official and National Statistics

Dates for forthcoming publications are confirmed approximately six to eight weeks ahead of publication; until this point, the HSCIC announces only the planned month of publication.
