Purpose

This paper describes HSCIC Official Statistics publications planned for February 2014, media coverage for press released Official Statistics publications and web activity for publications released in November 2013.

Background to HSCIC Official Statistics

At 31 October 2013, the HSCIC is responsible for the 110 series of Official Statistics of which 38 are designated as National Statistics, which means that the UK Statistics Authority (UKSA) recognises them as being compliant with the Code of Practice of Official Statistics.

“Experimental statistics” are new Official Statistics that are under-going evaluation. A key part of this evaluation is user engagement whereby the HSCIC invites readers to comment on the publications, which helps to inform future releases.

Official Statistics are expected to evolve and improve over time, to meet the changing needs of our users, to improve their quality and utility and to respond to changes in the administrative and management data sources.

Most HSCIC Official Statistics are published annually or more frequently. Generally, each edition is similar in content to previous versions but any substantial changes are noted below (note: no such changes for February’s publications).

National Statistics are identified below with [NS]
